Test and issues found:

1. The patient cannot upload files or document when chatting with doctor please fix that
2. We should be able to check if a patient picked a call or they missed the call and notify them if they missed the call from the doctor
3. On the call the audio is not working on either side
4. The notification on the admin part is transparent so it passes through the video call box

5 Need to

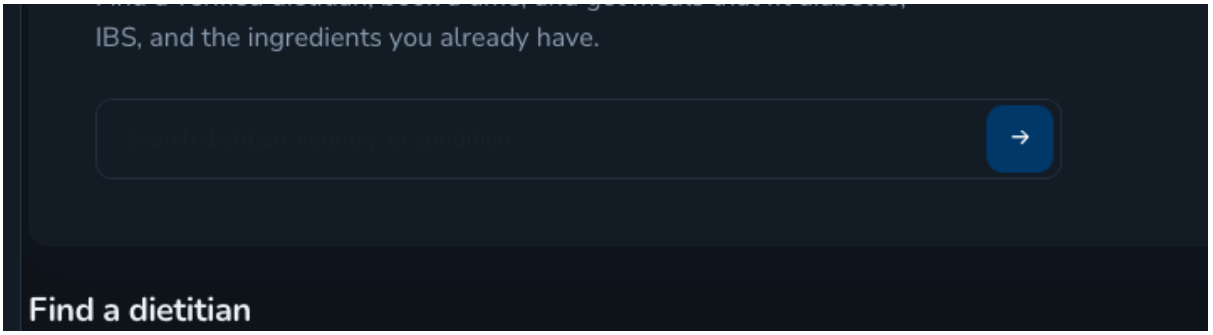

Change “Food for you

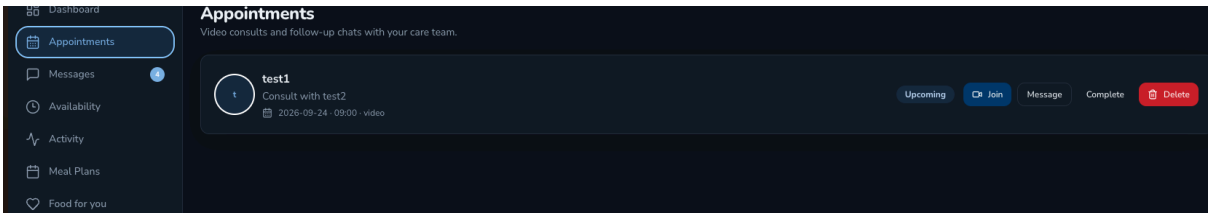

To “**Get right food guidance for your condition.**

Connect with a verified dietitian who understands your health needs and guides you on the right foods and meals for your condition.

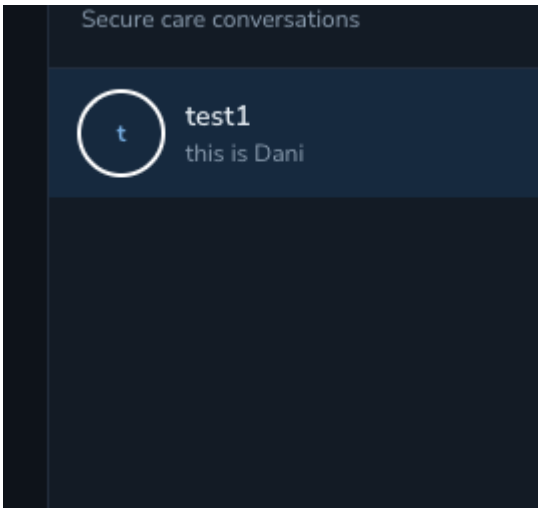

6 On dark mode the tex on this box is not showing fix it

7 If an appointment is not yet complete you should see like that notification number that will show the amounts of appointments you hvae not completed yet ..this is for both patient and dieticins

8 The user profile pics is not showing on the dietician side.. But the users can see the dieticians picture

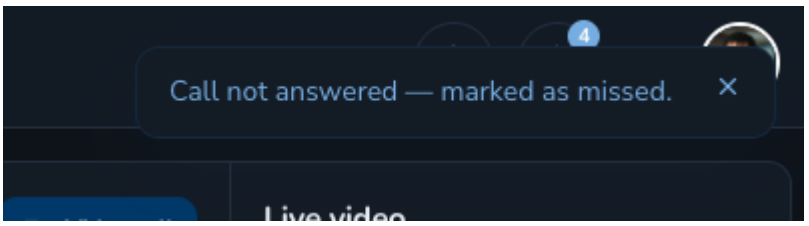

9 When I send in files into the message box the files are not being seen ..like I mean files are not sending

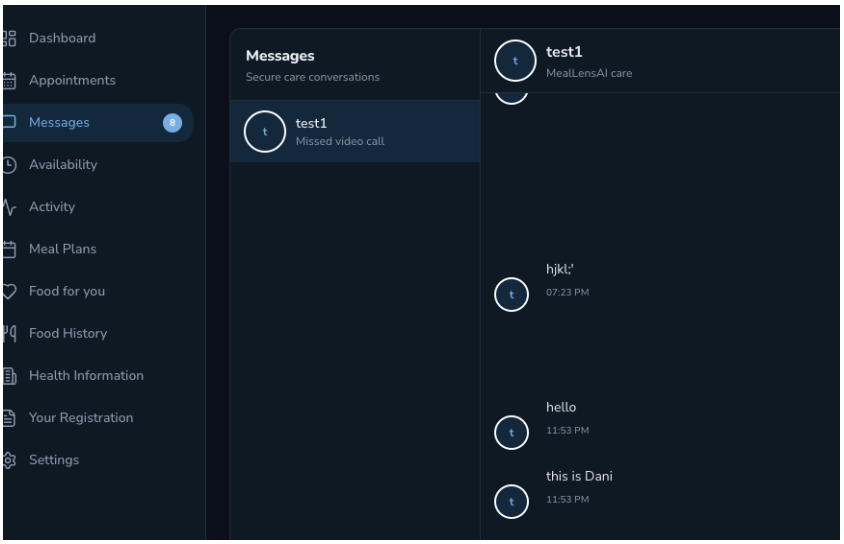

10. When a call comes in I should get like a ring tone on the browser that calls the person .. just like if I call someone on slack on my browser it will ring and I can hear

11. When I call the audio is not being heard by both the two speakers i think that the mic is not one or something and you cannot even select camera or mic device

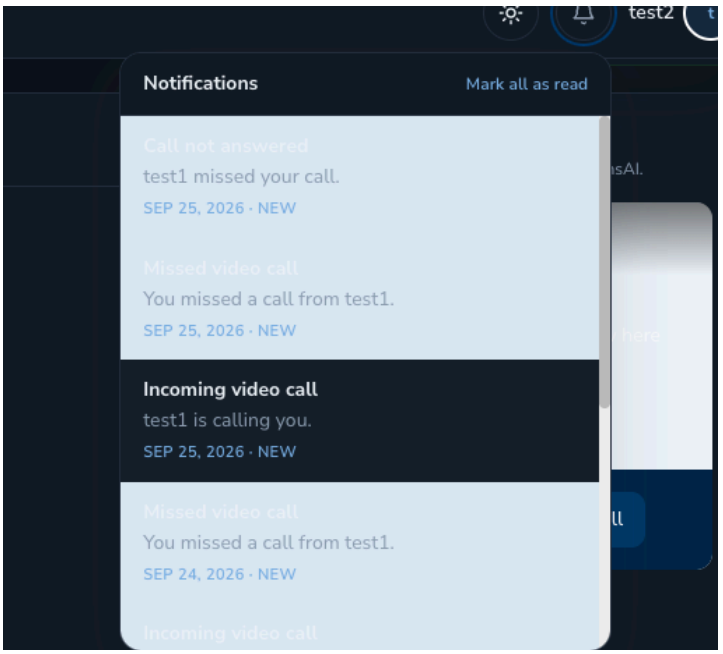

12 I see that the notification does not go away until I click the “x” .. it should go away once some little time is gone …(use the normal time other apps use for that)

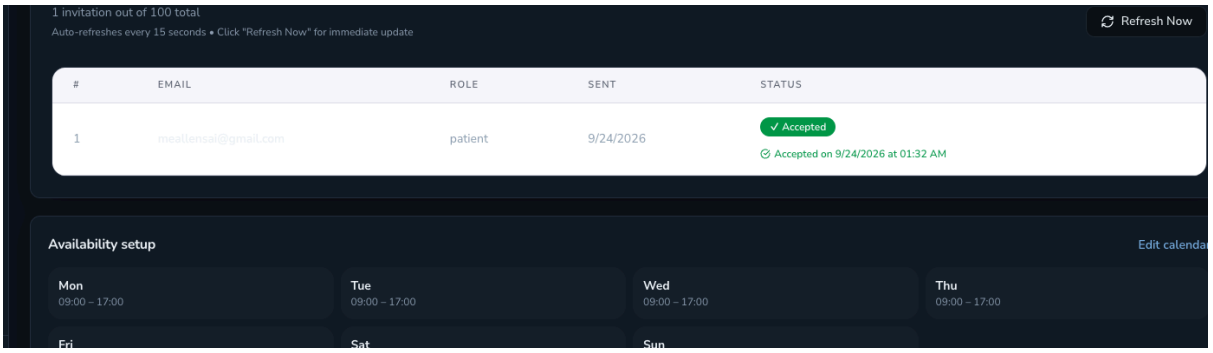

13: once the person sees the chat or messaget that mean they have seen it so this number of missed message should not be there .. just like how facebook and other apps work

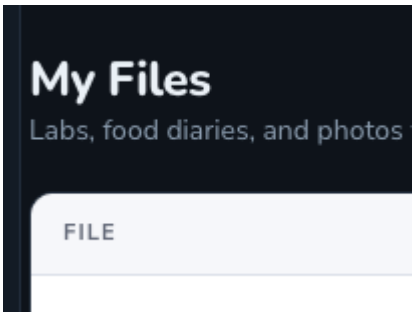

14. On darkmode the notification looks pile .. it is not dark too it should be dark

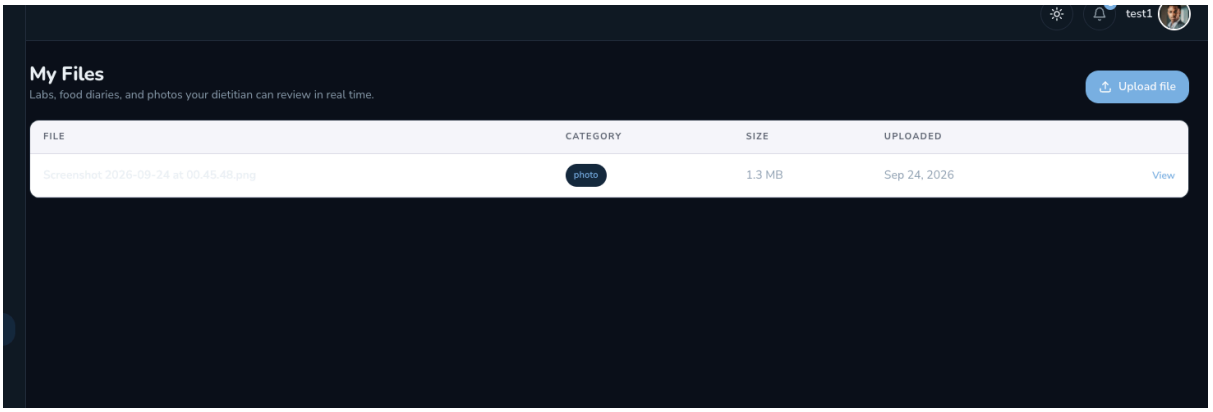

15 On dark mode this invite place should be dark too

16 This tap should be called my health files..rename it

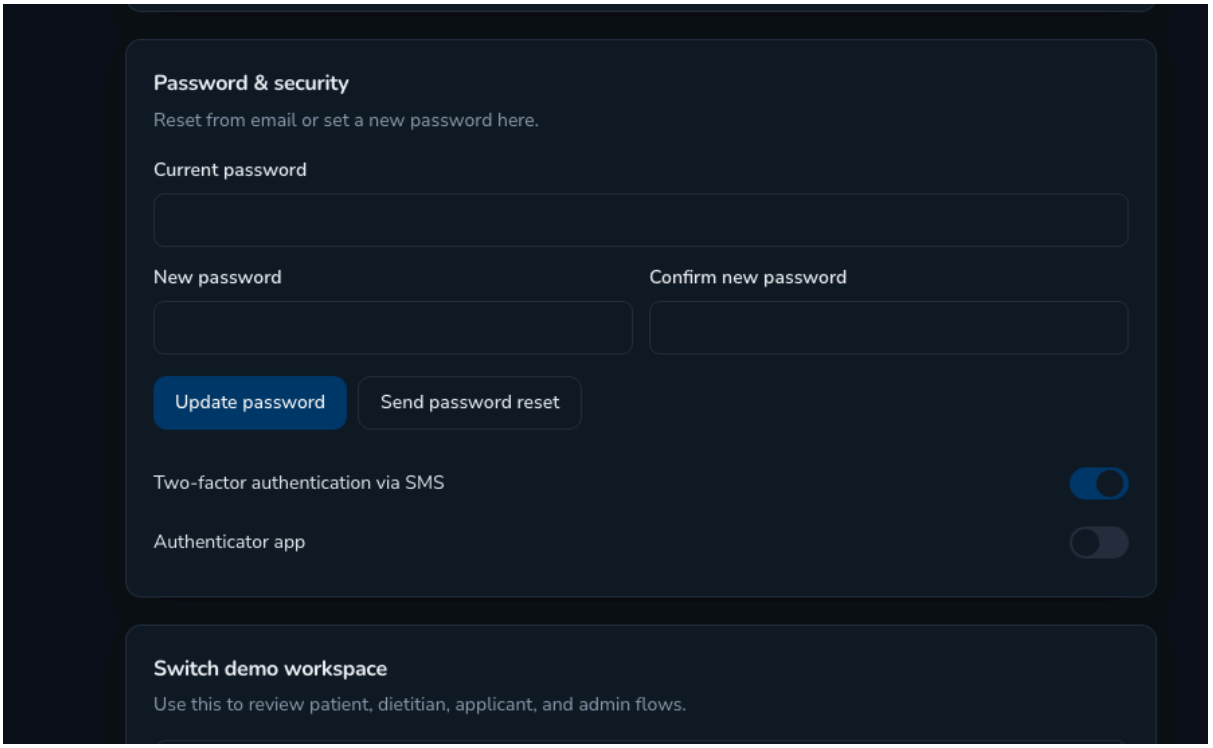

17 In dark moade this file place should be dark too same with the payment page

18 on the profile page of the patients I cannot update password it was working before now I think you took it off .. I think you moved it to the dietician page ..lol it is ment to be on the

patient profile page

19 The patient dashboard on the dietician part looks different plase make it look like what we have in the patient side.. You see I have send a pics of it bellow
